EDUCATION	The Wharton School of the University of Pennsylvania	
	Doctor of Philosophy (Ph.D.) – Managerial Science and Applied Economics Operations, Information and Decisions Department (Operations Management Track) <i>September 2024 – May 2029</i>	
	University of Pennsylvania School of Engineering and Applied Science	
	Master of Science in Engineering (M.S.E.) – Systems Engineering Accelerated Master’s Program (concurrent with bachelor’s degree) <i>September 2021 – May 2023</i>	
	University of Pennsylvania School of Engineering and Applied Science	
	Bachelor of Science in Engineering (B.S.E.) – Systems Engineering, <i>Summa Cum Laude</i> Concentration in Decision Science, minors in Computer Science and Mathematics <i>September 2019 – May 2023</i>	
WORK IN PROGRESS	Queues with Cues: How Visual Congestion Drives Join-or-Balk Decisions	
	<i>Enzo A. Bergamo, Gad Allon, and Ken Moon</i> Using computer vision applied to video data from a sports stadium concession queue, this study shows that customers rely primarily on visual cues—rather than queue length, as often assumed—to infer congestion and make join-or-balk decisions. A regression discontinuity design provides causal evidence that entry decisions respond to visual presentation beyond headcount, while a structural entry model shows that perception-driven behavior overturns classical equivalence results, generating welfare differences of up to 45%. The findings suggest that queue layout and presentation are not merely cosmetic features, but operational levers that can shape demand and policy effectiveness.	
FELLOWSHIPS AND AWARDS	George James Travel Award (\$800)	2026
	Marjorie Weiler Prize for Excellence in Writing	2026
	Fishman-Davidson Center Research Grant (\$7,000)	2026
	Mack Institute Research Fellowship (\$10,000)	2026
	Wharton Doctoral Fellowship	2024 – 2029
	Norman Gross Award	2023
	Kleinman Climate Fellow	2023
	IDDEAS Scholar	2023
	Penn World Scholar	2019 – 2023
TEACHING EXPERIENCE	At the Wharton School of the University of Pennsylvania:	
	Teaching Assistant , Quality and Productivity (OIDD 6110, MBA Core) <i>Fall 2025 (Christian Terwiesch, Santiago Gallino); Spring 2026 (Christian Terwiesch)</i>	
	Instructor , Wharton Ph.D. Summer Math Camp <i>Summer 2025, Summer 2026</i>	
	At the University of Pennsylvania School of Engineering and Applied Science:	
	Teaching Assistant , Stochastic Systems Analysis and Simulation (ESE 3030) <i>Spring 2023 (Shirin Saeedi Bidokhti)</i>	

Teaching Assistant, Statistics for Data Science (ESE 5420)

Summer 2022 (Jyh-Jing Hwang)

Teaching Assistant, Graph Neural Networks (ESE 5140)

Fall 2021 (Alejandro Ribeiro)

Teaching Assistant, Introduction to Computer Programming (CIS 1100)

Spring 2021 (Harry Smith); Summer 2021 (Adam Mally); Fall 2021 (Harry Smith, Eric Fouh);

Spring 2022 (Harry Smith, Travis McGaha); Fall 2022 (Harry Smith, Eric Fouh)

Teaching Assistant, Computational Linear Algebra (MATH 3130/5130)

Spring 2022 (Martin Bies); Spring 2023 (Harry Smit, Yingdi Qin)

SERVICE 2026 Wharton Innovation Doctoral Symposium Organizing Committee

SKILLS **Technical:** Python, R, Java, SQL, SAS, Git, L^AT_EX

Languages: English and Portuguese (fluent), Italian and Spanish (conversational)

INDUSTRY **Analysis Group**, Boston, MA

EXPERIENCE Senior Analyst (prev. Analyst, Summer Analyst)

Data science and economic consulting for a party in the DOJ's digital advertising antitrust case; assessment of educational outcomes for new high school curriculum in Armenia (pro bono).

June 2023 – July 2024, June 2022 – August 2022

Last updated: June 26, 2026
